**Objective:** Seeking a dynamic and challenging role in software development, leveraging my extensive experience and innovative mindset to drive impactful solutions. Dedicated to delivering high-quality results, I aim to contribute my analytical prowess and passion for problem-solving to foster the growth and success of the organization.

**Experience Summary:** Accumulating 1 year and 4 months of valuable experience in software development, combining internship and employment roles. Proficient in utilizing the Angular framework and Node.js to deliver robust solutions. Demonstrated ability to tackle complex challenges and contribute effectively to project success.

**Professional Experience:**

- ❖ Proficient in developing dynamic web applications using a diverse technology stack including **HTML, CSS, Node.js, Express.js, JavaScript, TypeScript, and AngularJS.**
- ❖ Demonstrated ability to collaborate effectively within cross-functional teams, facilitating seamless coordination and achieving project objectives efficiently.

**Tool Skills:**

**Languages :** Proficient in **Python.**

**Frameworks :** Experienced in working with the **Angular** framework and **Node.js**

**Web Technologies :** Skilled in **HTML, CSS, and JavaScript** for web development.

**R-Databases : PostgreSQL**

**Version Control :** Proficient in using **Gitlab** for version control and collaboration.

**Operating Systems :** Experienced in working with the Windows family of operating systems.

**API Testing :** Familiar with **Postman** for API testing

**Work Experience:**

**Company :** Clouddaru Infotech Pvt.ltd  
**Duration :** Sep 2023 – Apr 2024  
**Designation :** Junior Software Developer

**Project #1:** VPD Feb-2023 to Apr 2024  
**Client:** VPD

**Environment:** Angular, node, Postgresql, Gitlab

**Description:**

VPD is currently using RFMS solutions to enable PF, GF and Superannuation processing to its customers and create business value. In order to ensure future readiness and offer scalability to its customers, VPD embarked on a journey to create a cloud based digital solution using modern web technologies.

Employee Benefit Fund Management System is created using proven web technologies and is deployed on the AWS cloud platform. It is designed to enable the business to scale quickly to meet the increasing business requirements while addressing the security concerns. The modular design enables flexibility to extend the functionality to quickly include additional features as per the business demand--Employee Benefit Fund Management System is designed to handle Provident Fund, Gratuity and Superannuation services for client organizations and their respective Trusts. The system fulfills needs and requirements of the three stakeholders, namely Employees, Employers and Trustees. Subscription Based Services – By module (PF, GF, and ESS)

**Responsibilities:**

- ❖ Designed and developed responsive web pages using Bootstrap and AngularJS, ensuring optimal user experience across devices and screen sizes.
- ❖ Developed RESTful APIs using the Express.js framework with Node.js to fulfill specific client requirements, enabling seamless communication between front-end and back-end systems.
- ❖ Collaborated with backend developers to integrate front-end interfaces seamlessly with backend APIs, facilitating efficient data exchange and functionality.
- ❖ Demonstrated proactive problem-solving skills by identifying and resolving critical bugs in the application, ensuring smooth operation and user satisfaction.
- ❖ Played a key role in team collaboration, actively participating in brainstorming sessions and contributing ideas for implementing new features and enhancements to meet project objectives effectively.

**Internship Experience :**

**Company** : Clouddaru Infotech Pvt.Ltd

**Duration** : Feb 2023 - Aug 2023

**Description :**

During my internship at Clouddaru Infotech Pvt.Ltd , I played a key role in enhancing the front-end user interface, implementing various UI enhancements to improve usability and user experience. Additionally, I tackled minor issues and bugs across the front-end and backend, demonstrating my problem-solving skills and attention to detail. Through this experience, I gained valuable hands-on experience in front-end development, backend debugging, and teamwork, contributing to the overall success of the project I was involved in.

**Certifications:**

- Problem solving through programming in c (NPTEL)
